

# Quicken Problems With Panda

On June 10, 2015, problems were discovered with Panda Anti-Virus software.

If you use Quicken financial software, Panda may falsely quarantine file "C:\PROGRAM FILES (X86)\QUICKEN\QW.EXE" as a virus.

This is a false positive.

The solution is to add the above file name to the Panda Exclusion List. This list is found in "Panda Start / Settings / Antivirus / Exclusions / Add..."

See the following image for an example:
